

Sign up for 3 hours of international virtual classroom exchange  
 + Guide your students to submit a collaborative map project

= Get \$3000 for your classroom!

The My Community, Our Earth: Global Connections and Exchange Program (MyCOE GCE) is connecting high school students in the U.S. with their peers abroad. Through virtual online meetings, high school students throughout the world will develop collaborative, youth-led projects that map sustainable development issues. These meetings are arranged through online video conferences, internet phone calls and chat sessions. Project topics include environmental themes while enriching cultural literacy.

We are supporting up to 100 U.S. high school educators (formal and informal) of any subject matter to participate and expand our classroom network.

International  
 Classrooms:  
 Bolivia  
 Ghana  
 Nicaragua  
 Philippines

Topic Areas:

Climate Change  
 Food Security and Vulnerability  
 Green Economy  
 Natural Disasters and Hazards  
 Sustainable Development  
 Youth Leadership
